## AMERICAN TELEGRAPH.

California.
A letter to the Boston Journal says that hundreds of mechanics are flocking into California, who generally arrive there without a dime, after paying expenses of passage, &c. He says: "I have had at least a hundred men to offer to work for me for their board, and you can hire as many as you want for from thirty to fifty dollars per month, and on that sum no man can live out here, when provisions are as high as they new are." A man earning seventy-five cents a day in the Eastern cities, he says, is better off than one receiving three or four dollars in California.

"Since last July I have slept on the ground, with merely a blanket over me, and, when it was raining in torrents, a piece of board to keep me from the wet, and an old tent to keep the thickest off my head. I have lived like a nig-ger, and worked like a slave, and you know how much of the stuff called gold I have been able to send home. If it had not been for my pride, I should have been home long ago. one knows what I have suffered — sometimes even for food, and with nothing but the blue canopy of heaven to cover me at night. You will see in the papers accounts of rich discoveries made out here. Some of them are true : but by testing, nine out of ten would not pay a man a dollar a day. At the present time, there are some seventy miners around my bridge, and they do not average one dollar per day; and it is so all over the mines."

## Kossuth at New Orleans.

In the preamble and resolutions introduced into the Louisiana legislature, in view of the advent of "the great Magyar," it is stated that we are one people, at peace with all the world, ready and willing to protect and foster the oppressed of all nations who seek an asylum among us, cultivating a spirit of peace and amity with all the nations of the earth; that Louis Kossuth has been the full recipient of our national sympathy and consideration, and should humiliate, rather than exalt himself in American presence: that, so far as he is a martyr to the cause of human liberty, they extend to him sympathy and a refuge; that the State of Louisiana can in no wise countenance the arrogance which has characterized him in his insult to American officers, and his jeoparding the honor of the American flag, on an American national vessel; that his avowed doctrine of intervention with the affairs of other nations is anti-American; that Louisiana cannot receive him as her guest, but she will cordially receive him as a patron of freedom, driven from his home, provided that he exonerates himself from the imputation of publicly or privately ridiculing an interview with Henry Clay, and of casting censure upon the doctrines sacred to our national faith and integrity.

ORIGIN OF SEEDS .- In an account of the "origin of various plants," which we find in the newspapers, it is stated that "wild oats are found in Northern Africa." They were probably sown by Antony, when Cleopatra was the belle of that

"Hops come from Germany." That is true of a "waltz," certainly; but other kinds were imported from Spain and Switzerland. "Cabbage grows wild in Sicily." If this state ment be true, the tailors in that country can af-

ford to be honest. "Rape seed is a native of Naples." It is a great pity, for the morals of mankind, that it should

ever have been naturalized elsewhere.
"Potatoes come from Peru." We should suppose so, from the price which we have to pay for "Far-fetched and dear-bought" is an "old saw" which has a plenty of "modern instances."

A New Side-Saddle .- We have seen a capital article, the invention of Disbrow, at his riding-school, No. 20 Fourth Avenue. It renders horsemanship perfectly safe to the ladies, by the addition of a new support to the outside of the near crutch, against which the knee of the rider At the same time, that part of the saddle which heretofore rested upon the shoulders is cut out, saving the animal from those painful excoriations so frequently witnessed. This saddle holds the lady firmly in her seat, and she may safely trust herself on a restive horse, gallop, leap fences, and perform other feats which would be attended with some risk to an inexperienced rider occupying the common side-saddle. We are glad to see this invention, and we doubt not that the ladies will hail it with much pleasure.-

If a tallow candle be placed in a gun and be shot at a door, it will go through without sustaining any injury; and if a musket ball be fired in water, it will rebound and be flattened, as if fired against any hard substance. A musket ball may be fired against a pane of glass, and if the glass be suspended by a thread, it will make no difference, and the thread not even vibrate. Cork, if sunk twenty feet in the ocean, will not rise on account of the pressure of the water. In the Arctic regions, when the thermometer is below zero, persons can converse more than a mile distant. Mr. Jameson asserts that he heard every word of a sermon at the distance of two miles, on a still day, with perfect distinctness

The Rev. Mr. Osgood, a venerable clergyman, lately resident at Montreal, who has visited various parts of the Union occasionally for the past thirty years, as a missionary for Sunday schools, and as a chaplain for seamen, died in Glasgow. Scotland, on Monday, the 19th of January. He had crossed the Atlantic fourteen times, visiting England and Scotland. His death was sudden, as he had been engaged in his usual labors up to within a day or two of his death, when he was attacked with asthma, which terminated fatally

A NEW APPLIANCE OF VILLANY .- On Saturday night, in Louisville, Ky., thieves made entrance into a dwelling-house by means of outsiders, and, finding their way to the room where the family (three persons) were sleeping, applied chloroform to their nostrils, until they were sufficiently stu-pefied to be past the possibility of waking by any noise that might be produced. Thus secured, the rascals ransacked the house, and made way with money, jewelry, and other valuables at their lei-

A French woman, in Savannah, Ga., thirtythree years of age, has just given birth to her twenty-second, twenty-third, and twenty-fourth children. She has produced the whole twentyfour in nine years. They come three at a time, and are all doing remarkably well. What is singular, and at the same time provoking to the husband, who desires to transmit his name and title, they are every one of them girls.

A Wisconsin paper says; Six years ago Wisconsin had six priests, one bishop, with not over four thousand Roman Catholies: it now contains about sixty thousand. At Fond du Lac (Wis.) there are now over three hundred and fifty Roman Catholic families where two and a half years age there were not twenty. The pastor is the Rev.

WILMINGTON BOARDING SCHOOL
FOR BOYS.—This institution is situated in one of the healthiest parts of the city of Wilmington, entirely beyond the settled portions of the town. The uniform healthfulness of the location may be inferred from the fact that, since the establishment of the School, about twenty-eight years, very few cases of serious indisposition have occurred among the pupils, and not a single death either here, or from diseases contracted while here.

The course of instruction includes, besides the ordinary English branches, Natural Philosophy, Chemistry, Physiology, History, Rhetoric, the various branches of Mathematics, and the Latin, Greek, and French Languages. Particular attention is paid to the higher Mathematics and their application to Mechanics and Engineering; the latter and Surveying are taught practically by field operations, with the use of appropriate instruments. Lectures on Natural Philosophy and Chemistry, in which all the important principles are illustrated by experiments, are regularly delivered before the students.

As the object is to make the instruction as thorough and practical as possible, no expense has been spared in providing suitable apparatus. It is believed that, in this respect, the Institution will compare favorably with any similar one in the country. A carefully selected library, of more than one thousand volumes, containing works on the various branches of Literature and Science, furnishes ample reading matter; while a Laboratory, fully supplied with apparatus and tests, contains all that is necessary for practical instruction in Chemical Manipulation.

The school year commenced on the third Second-day (Monday) of the Ninth month, (September,) and is divided into four quarters of eleven weeks each, leaving a vacation of two months, from about the middle of the Serventh month (July).

the attention of those purchasing Libraries.

A General Index to the first 47 Vols. of the English Common Law Reports.

lish Common Law Reports.

By Hon. George Sharswood and George W. Biddle, Esgrs. 1 vol. 8vo.—\$5 00.

With this Key to their contents, the English Common Law Reports present to the Profession a mass of legal learning in the shape of Opinions, Data, claborate Arguments, &c., &c., sufficient, probably, for the Elucidation and Prosecution or Defence of any case that can arise in our Courts of Law; and being thus made easily and instantly accessible, these Reports will be found so comprehensive, convenient, and cheap, as to supersede the necessity of other or more expensive scales.

The Index will be found of great value to all possessing the Reports; and of great convenience to those having access to, but not owning the series.

CAMERIDGE, January 25, 1846.

Messrs. T. & J. W. Johnson:
Gentlemen.—In reply to your letter, I can with great sincerity say, that I entertain a very high opinion of the recent Exchequer Reports. In my judgment they are not excelled by any cotemporaneous Reports, in learning, ability, or general utility and interest. The cases decided are discussed with great care, and expounded with uncommon force. I scarcely know of any volumes which I deem of more importance or value for a Professional labrary.

JOSEPH STORY.

CAMBRIDGE, January 25, 1845. Gentlemen: Your letter of the 24th has been received, in which you ask my opinion as to the value of the English Exchequer Reports, from Price downwards to this time, to an American Lawyer, and as to the expediency of reprinting them in this country. Of the high value of these Reports, both on the Pleas and Equity sides of the Court, I have not the least doubt—the decisions of this Court for the last fifteen or twenty years, both at Equity and in Common Law, being entitled to equal respect with any others in England. I should think an American Lawyer's Library essentially incomplete without them.

I am, gentlemen, very respectfully yours, SIMON GREENLEAF. Messrs, T. & J. W. Johnson.

The cheapest Law Periodical in the United States.

It is our determination to make the Law Library the cheapest series of reprints of English Law publications in this country. The Editorial Department will, we trust, be found fully to realize the expectations of those who have enjoyed Smith's Mercantile Law, Touchstone, Broom's Legal Maxims, Archbold's Nisi Prius, Archbold's Landlord and Tenant, Crabb on Real Proporty, Smith on Contracts.

The high reputation which the "Law Library" has acquired throughout the United States, by the character of its volumes, and by the cheap rate at which its valuable contents have been presented to the Profession, is the best evidence we can offer of its merits and its claims for your support. We hope, and will aim, to retain this high character.

THE TESTIMONY OF ONE OF OUR LAWYERS.—
Mr. JAS. L. HAMILTON—DEAR SR: Although the number and respectability of the testimonials of which you are already in possession, as to the efficacy of your Medicine, "THE GREAT VA. REMEDY," in the diseases which it is designed to cure, are sufficient, in my opinion, to establish its reputation, and secure for it such patronage as will adequately reward you for the discovery of so inestimable a Medicine—yet the great benefit which I have derived from its use, and the salutary effects which I have derived from its use, and the salutary effects which I have derived from its use, and the salutary effects which I have derived from its use, and the salutary effects which I have derived from its use, and the salutary effects which I have of it, this formal schoolwher is sanitary virtues. My own case was Dyspepsia of long duration, and very aggravated in its sharacter, manifested by an almost total destruction of the digestive functions, great debility, nervousness, emaciation, and impaired appetite, with pain, and a burning sensation in the left side of the chest, palpitation of the heart, vertigo and congestion in the head, and many other symptoms indicative of the worst type of the disease, by the use of three or four bottles of your preparation, been entirely relieved. The cases of my friends, in which your Medicine was taken, were Dyspepsia, Chronic Headache, and Sore Throat, in all of which it proved efficacious, after the trial of a rast number of other remedies without benefit. Your medicine is as pleasant to the taste as a cordial, and in my experience corrects all derangement of the stomach, restores the wasted or enfeebled energies of the digestive organs, and imparts strength and reanimation to the whole system.

Very respectfulty, yours, &c.,

Letter from the Hon. Henry Clay.

ASHLAND, 20th July, 1849.

Dear Sir: I wish to express to you the gratification I derived on receiving the July number of the Merchants' Magazine and Commercial Review, from viewing your portrait in the beginning, and from reading your address to your friends at the end of it. When we feel under obligations to those who have contributed to our information and amusement, we are naturally desirous to poseess all the knowledge of them, of their appearance, of the features of their countenance, and of the character and habits of their mind, which we can acquire. You have placed your numerous readers (at least you have me, if I may not speak for them) under those obligations; and the number of your valuable work now before me, in some degree, satisfies the desire to which I have alluded.

I have become quite familiar with the Magazine and Review, and have no hesitation in expressing my humble opinion that it is eminently entitled to the public regard and support. It collects and arranges, in good order, a large amount of valuable statistical and other information, highly useful not only to the merchant, but to the stateman, to the cultivator of the earth, to the manufacturer, to the mariner, in short, to all classes of the business and reading community.

Entertaining this opinion, I am glad that it has been, and

Entertaining this opinion, I am glad that it has been, and hope that it may continue to be, liberally patronized.

Offering you cordial assurances of my esteem and regard, I am truly your friend and obedient servant,

Extract of a letter from Hon. Millard Fillmore.

"I have read it (Merchants' Magazine) with a good deal of attention, and have no hesitation in saying that I think it one of the most valuable periodicals that was ever published. To the merchant it seems quite indispensable, and to the statesman and man of general information almost equally desirable. It is a grand repository of useful facts and information, which can be found nowhers so well digested and so accessible as in these numbers. I only regret that I do not own the whole work." Letter from the Hon. Thomas H. Benton.

Letter from the Hon. Thomas H. Benton.

Washington City, April 20, 1849.

Mr. Freeman Hunt.—Sir: I owe you many thanks for the opportunities I have had to read the Merchants' Magazine, and have found it in reality to be a magazine, and that well replenished, of all the useful matter which the title would imply, and presented with a fullness and clearness which delights while it instructs. It is, in fact, a merchants' magazine in the large acceptation of the term—merchants who go between nations, whose large operations bring many departments of knowledge, and a view of the state of the world, into daily requisition. But it is not the great merchant only, but the one of more modest, but, nevertheless, of most useful operations—the merchant of the interior also—who will find this magazine to abound with the information the pursuit of his business and the elevation of the mercantile character requires. Nor is its utility at all confined to merchants, but extends to the legislator and diplomatist, and to all who are charged with managing the affairs of the nation. For myself, I have found it most useful to mevin my senatorial labors, and have been in the habit for many years of carefully consulting it.

Very respectfully, sir, your obedient servant,

THOMAS H. BENTON.

Letter from Hon. Wm. H. Seward. My Dear Sir: Have the goodness to place my name on your list of subscribers for the Merchants' Magazine. I regard it as an invaluable work for the use of all who would understand not merely commercial operations in this extending country, but the fiscal and commercial questions involved in the administration of the government.

THIS NEW AND SPLENDID ESTABLISHMENT for the scientific treatment of the various diseases with which the human system is afflicted, is situated about three miles from the city of Buffalo, in a rural spot, and so accessible from all points as to be reached without inconvenience or delay.

A line of omnibuses runs from the steamboat landings in Buffalo to the springs every ten minutes.

The house and grounds are near the extensive and beautiful green-houses and nurseries of the Messrs. Hodges & Bryants; and the scenery in all directions is unsurpassed, as regards either variety or beauty; embracing points of view, from which may be taken in at a glance the broad expanse of Lake Erie, the Ningara flowing majestically towards the Falls, extensive forests, and the "Queen City of the Lakes," with its moving panorama of steamboats and ceaseless enterprise.

The water, taken immediately from the celebrated "Cold Spring," is unsurpassed as regards coldness and purity, by any in the United States. The house, recently erected at a cost of about seven thousand dollars, has been fitted up in a neat and elegant style, at considerable extra expense, and is sufficiently capacious to accommodate seventy-five patients.

Connected with the establishment, and constitu 1 pone of its attractions, are the fixtures and convenience: 10 innocent and healthful gymnastic exercises.

MEDICAL DEPARTMENT. MEDICAL DEPARTMENT.

The institution is under the general supervision of S. M. Davis, M. D., Professor of the Theory and Practice of Medicine in Central Medical College, and Geo. W. Davis, M. D., formerly of Dansville, N. Y., the resident physician, and is permanently associated with the before mentioned gentleman as counsel, and associate of the medical board of control. And the friends of the establishment deem it a matter of felicitation that the services of Miss Mary M. Taylor, a lady of high medical attainments, who has attended two courses of lectures in the Central Medical College, have been secured, and that female patients can at any time avail themselves of her invaluable aid and counsel.

A return from a wide and fatal departure from the simplicity of Nature's laws is called for, slike by a rational love of happiness and the deplorable exigencies of our condition. Hydropathy, or a scientific use of water as a restorative and curative agent, is a practical substitution of a simple and remarkably efficacious mode of curing the sick; for that system of drugging, depleting, and cauterizing, which, in obtaining the mastery over disease, too frequently places the patient beyond the reach of further annoyance. The success of the various Water Cure establishments in this country, to say nothing of any other, has fully confirmed the hopes of the early discoverers and promulgators of the great ruths upon which the system is founded, and renders verbal communications unnecessary. It is deemed, sufficient to say, that the "Cold Spring Water Cure" will compare favorably with any of the well-conducted establishments of a similar character, and will be found equal to the best, as regards the order, convenience, and desirableness of its arrangements. The institution is now open for the reception of patients, and in full operation.
